Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record does not, alone or in combination, disclose (1) providing the assembly of sensors with at least one magnetic feedback; and using the SSS method to separate the biomagnetic useful signal being measured from the signals (originating from outside the measurement region), which signals are produced by the actuators and the external interferences (claim 1); or (2) a feedback coil coupled to each sensors; and control electronics for separating the biomagnetic useful signal from the signals originating from outside the measurement region), which signals are produced by the actuators and the external interferences (claim 11).

NOTE: In construing the claims, the Examiner has the following interpretations: (1) The acronym "SSS" stands for "Signal, Space, Separation." (2) The phrase within parentheses "originating from outside the measurement region" in claims 1 and 11 is considered as a limitation of the claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Bot LeDinh whose telephone number is 571-272-2231.
